PROFILE INFO

As a passionate and detail-oriented frontend developer, I work in building user-friendly, dynamic web interfaces. With hands on in modern frameworks like ReactJs and styling tools such as TailwindCSS and SCSS, I create visually appealing and responsive websites that enhance user experiences. I thrive on problem-solving, staying up-to-date with emerging technologies, and transforming creative ideas into functional, interactive designs.

PROJECTS

01 Multi Page Form [🔗](#)

This responsive multi-page form utilizes TypeScript for type safety and maintainability, SCSS for flexible and maintainable styling, and Yup for comprehensive form validation, ensuring data integrity and a smooth user experience.

02 Single-Page-E-commerce [🔗](#)

A responsive single Ecom landing page that lets user add the shoe item to cart, built with Typescript for type safety and maintainability, and SCSS for flexible and maintainable styling.

03 Cafe Menu with Cart [🔗](#)

A responsive cafe menu landing page that lets user order the products and add products to cart, built with Javascript and TailwindCSS for styling.
