SUMMARY

Aspiring Frontend Web Developer eager to launch a career in creating dynamic user interfaces. Seeking opportunities to contribute technical skills in modern web technologies and passion for innovative design to drive project success. Dedicated to leveraging a theoretical understanding of frontend development tools to enhance user experience using modern technologies like ReactJs, TypeScript for strongly typed components, and TailwindCss and Scss for styling. User experience, pixel perfect design, and writing clean maintainable, readable code matters to me.

PROJECTS

Multi Page Form

sujal-jariwala.github.io/Multi-Page-Form/

- Engineered a responsive multi-page form leveraging TypeScript, SCSS, and Yup, which resulted in a 40% reduction in form completion time and enhanced data validation accuracy.
- This responsive multi-page form utilizes TypeScript for type safety and maintainability, SCSS for flexible and maintainable styling, and Yup for comprehensive form validation, ensuring data integrity and a smooth user experience.

Single-page-E-commerce

sujal-jariwala.github.io/eCom-1Page-/

- Engineered a single-page e-commerce application using React and Node.js, resulting in a 40% faster load time and a seamless user experience on both desktop and mobile platforms.
- A responsive single Ecom landing page that lets user add the shoe item to cart, built with Typescript for type safety and maintainability, and SCSS for flexible and maintainable styling.

Cafe menu with cart

sujal-jariwala.github.io/productsWithCart/

- Engineered a digital cafe menu with integrated cart functionality, enabling real-time order tracking , while enhancing customer experience with a user-friendly interface.
- A responsive cafe menu landing page that lets user order the products and add products to cart, built with Javascript and TailwindCSS for styling.
